

MIME FACE MASK PATTERN

1. Print out page 2 and 3 of this document.
- 2 Cut out each half along the solid black lines.
3. Tape the 2 halves together so they look like the mask on this page.
4. Place this pattern on top of a piece of cardboard (10" X 11" recommended, cereal boxes are good for this).
5. Trace the shape of the mask pattern onto your cardboard.
6. Cut out your cardboard mask using scissors, a box cutter or exacto knife.

This is a reference.

DO NOT use this to trace your mask unless you want to make a mask for a very small face.
